DURANT'S DUAL DEED.

Enough in Convict Him.

San Francisco, April 16.—The not is General Martinez Campos IsSc tightening around W. H. T. Durant, the dental student in jail for the murder of Blanche Lamont and Minnie Williams in the Emannel Baptist church. Chief HE IS NOW EN ROUTE TO CUBA. of Police Crowley claims to have evidence enough naw to couvlet him beyond any doubt.

Theodore Durant was yesterday evening formally charged with the murder of Minnie Williams. The coroner's in-quest upon Miss Williams has not yet been held. It will be a dual investigation. The police will produce their evidence regarding the murder of both

A further mystery is added to the affair by the report that Mrs. Ella Forsyth, who has been missing for a week, was also a member of that place week, was also a member of that made of worship. Her husband, who has been searching diligently for her, says she left home to go to the beach to gather shells. She has never been since seen or heard of, and it is surmised that the fate of Rhunche of the shear of t

The crimes with rebellion, which he is charged appear to have Private been the act of a man inspired by such bloody instruct, as the postmortem examinations clearly prove that the vic-tims were killed and afterward out-

George King, organist of the church where the horrible crimes were committed, made a statement to Chief of Police Crowley late yesterday afternoon which tends to fix one crime at least, the murder of Miss Lamont, upon Darant. King says that on April 3, the day Miss Lamont was missed, he went into the church about 5 p. ui. to practice on the organ.

He was very weak and pale and asked me to give hum a glass of bromo seltzer. I knew strange about his going up in the loft.

This is direct evidence of a most be remembered, left the high school at 3 p. m. on the day she was seen. April 3, with Durant. The theory is now of broma seltzer, and continued:

"When I returned Durant took a dose Saturday. and it seemed to nauscate him. He asked me how he looked. I told him he was pale and his eyes were a little cougested. What he did during the time I went into the ladies' parlor to look into a mirror, and I afterward found on the little shelf underneath a little clot of General Crombet. Eleven were killed. blood, as though he had wiped his finger on it. We then carried a little organ from upstairs down into the lecture room. Several times he stopped to rest and seemed quite weak. At 7 o'clock he left and went a short disrance with me down the street. I do taken. not remember whether he went back to the church or not,

In addition to this damaging evidence other equally incriminating evidence has been furnished. In the search for the crime many curious theories have been evolved assuming that Durant is guilty. The theory of the murder is the crimes were committed for the purpose of medical investigation. The statement has been made that Darant proposed to a number of girls that he be allowed to examine them for female troubles which he professed to be able to enre.

It is known that Durant was an ardent medical student and took great interest in the diseases of women. The theory is that he was crazed on the subject, and being unable to conduct his investigation in any legitimate unnuer, innerdered the girls for that purpose. The condition of the bodies after they were found would tend to carry out this line of reasoning.

Instead of abating the excitement over the horrible crimes is increasing. Every fresh rumor is an oxcuse for an extraedition of the newspapers which are engerly bought by crowds of people on the streets. Largo crowds gather in front of bulletin boards and haunt the scene of the crimes.

At places in Oklahoma there was a veritable shower of mud and in western Oklahoma and the Panhandle, Egyptian darkness prevailed. Crops were badly damaged. Wires are prostrated, and the west is

completely shut off from communication from this city direct. Electric flashes pierced the inky darkness with terrible rapidity and seemed to change everything with its element. Such a peculiar storm has seldom

"Not only so, but the customs revenues fell off \$135,000,000 during the four years' life of the McKinley tariff. In the same period the expenditures of the Government exceeded the receipts by \$31,000,000, while in the preceding four years the excess of revenue amounted to \$387,000,000. A Treasury surplus of nearly \$100,000,000 and a surplus revenue of the same amount both disappeared, and Secretary Foster actually had bond plates prepared to meet the impending deficiency.

"Equally damaging is the fact that during the McKinley-Harrison period the net loss in gold exports was \$122,-624,000, while in the Democratic quadrennial preceding it there was a net gain in gold imports of \$54,772,000.

The Judges, however, imagine they know more about the case than the juries, and now for the fourth time have granted him a new trial. Why don't they turn him loose at once and be done with the farce?

### Cincinnati Tabacca Market.

Furnished by the Chelmnatl Leaf Tobacco

Warehouse Company:

There was a considerable falling off in the offerings and sales of the past week, and also the receipts were not as large as they have been. This is of course a natural consequence of warmer wenther setting in, putting a check on winter order tobacco, and it is likely that for a month, perhaps, light sales will be the rule.

We note no quotable advance in prices, but the bidding was quite strong throughout the week and the supply vertainly no greater than the demand. The new tobacco sold up to 22c. Old stock though offered in light quantities only, ronmanded but indifferent attention, with the exception of very few bogsheads of fancy leaf, which always sells high. Although the sales of the new crop have not been unsatisfactory so far, the great drawback being the green tobacco, of which but very few lots are entirely free, and we think that purchases prudently made with care-

### APPLES IN GERMANY.

Exporting Fruit.

Washington, April 8.-United States General DeKay ut Berlin says in a report to the State Department that there is demand for good sound American apples in Germany, but no supply. 'The fault lies in America.

Fruit growers should pack carefully all kinds of apples that remain solid many months, and firms should keep themselves posted in regard to the needs of the growers' commerce, and by exercise of intelligence and faithful care keep up a steady connection. Apples at retail bring a very high price in Berlin during \$ the winter months, and there would be a good demand for dried and preserved

In a unsolicited letter (June 29, 1894.) she writes:

"About 9 or 10 years ago I was broken down in health and suffered from extreme nervousness, and severe neuralgie pains alllieted different parts of my body-sometimes the dreadful pain would be in my eyes and head, sometimes in my hand and often in my shoulders and neck. I took many remedies, but found none like Brown's Iron Bitters. I have used a few bottles every year since. I often praise it to others."
